

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Northern Trust Developed Real Estate Index Fund (the "Fund") Unit Class A EUR Accumulating A sub-fund of Northern Trust UCITS Common Contractual Fund

ISIN: IE00BKS80S30

Management Company: Northern Trust Fund Managers (Ireland) Limited (the "Manager")

OBJECTIVES AND INVESTMENT POLICY

The investment objective of the Fund is to closely match the risk and return characteristics of the FTSE EPRA/NAREIT Developed Index (the "Index") with net dividends reinvested.

The Fund invests in equities (that is, shares and other similar kinds of assets) of Real Estate Investment Trusts (REITs) and Real Estate Holding & Development companies which make up the Index. Real Estate Holding and Development companies are involved in real estate activities such as the ownership, management and/or development of income producing and for sale real estate.

Target Market: This Fund is appropriate for investors who plan to invest over the medium to long term; and are looking for a passively managed investment in the relevant market(s). This Fund may be appropriate for investors who seek a Fund which features tax transparency.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is an index tracking Fund which seeks to track the risk and return characteristics of the Index by buying most or all of the stocks of the Index. This means it may not hold all the same assets as the Index or hold assets in the same proportion as the Index, and the Fund may not match the Index performance.

The Manager considers that the Fund meets the criteria in Article 6 of the Sustainable Finance Disclosure Regulation (Regulation EU/2019/2088) and accordingly the investments

underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities. More information on Article 6 funds can be found in the Prospectus and on our website at www.northerntrust.com/europe/what-we-do/investment-management/sustainable-finance-regulation.

For efficient portfolio management purposes the Fund may invest in derivatives and other financially linked instruments (such as currency forwards and exchange traded futures) to reduce risk, minimise costs or generate additional capital or income. A derivative is a financial contract whose value is derived from other assets.

The units in the Fund are either accumulating or distributing. If you elect accumulating units, any income received will always be included in the value of your units. If you elect distributing units, any income received will be distributed annually, and you can request either a cash payment or additional units in the Fund.

You can buy or sell units daily (on each business day of the Fund). An application must be received by the Fund's administrator before 12.00pm (Irish time) on the business day prior to the relevant dealing day.

The base currency of the Fund is U.S. Dollar.

Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The rating is based upon changes in prices of the equities held by the Fund.

Investments in other countries are affected by exchange rate risk, where the currencies may fluctuate in value.

Performance volatility can be increased or reduced due to fluctuations in the currencies represented within this document.

The following risks are material in addition to the risks captured by the indicator above:

Investing in REITs (Real Estate Investment Trusts) is not equivalent to investing directly in property. Performance of property securities may be more dependent on the performance of stock markets than the property sector. The ability to sell properties and the sale prices achieved depend on market demand.

Liquidity Risk - Some recognised exchanges are less liquid or more volatile which may affect the price received and time taken when selling investments. Small capitalisation companies are also less liquid and this may result in fluctuations in the price of units.

Investment Risk - The Fund may not achieve its investment objective. An investment in the Fund involves investment risks including possible loss of the amount invested.

Counterparty Risk - In case of bankruptcy of the broker, there is no guarantee collateral held by the broker will be returned to the Fund. In the event of bankruptcy of the counterparty, the premium and any unrealised gains may be lost.

Derivative Risk - Derivatives may result in gains or losses that are greater than the original amount invested.

Valuation Risk - A position in the Fund may be valued incorrectly, as some prices may be uncertain at a point in time.

Currency Risk - Where a class of units are in a currency other than the base currency of the Fund, the non-base unit classes of the Fund may be affected unfavourably by fluctuations in currency rates.

For more information about risks, please see the section entitled "Risk Factors" of the Fund's prospectus and supplement, which are available at www.northerntrust.com/pooledfunds.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	No charge
Exit charge	1.00 %
This is the maximum that might be taken out of your money before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year
